-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 04 November 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Election/Restrictions

1. Applicant's election of group I, claims 1-18, in the reply filed on 11/4/2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

(a) The preamble of independent claims 1, 2 and 18 (and claims 3-17 by dependency) recites a "method for forming polypropylene." However, no method steps recite the formation of a polymer, and therefore it cannot be determined whether the method requires actual polymerization or whether the method requires only the recited steps of moving reagents through a conduit.

(b) Independent claims 1, 2 and 18 (and claims 3-17 by dependency) recite a partial disassembly and reconstruction of the reagent delivery system. However, the

Art Unit: 1713

claims do not indicate when (or even if) polymerization occurs; furthermore, there is nothing in the claims which requires that any of the recited steps take place in any particular order; therefore, it cannot be determined whether the replacement step is required to occur simultaneously with ongoing polymerization, or whether this step may occur at any time before, during or after polymerization.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-3, 11, 15 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Carlson et al. (US 2,508,744).

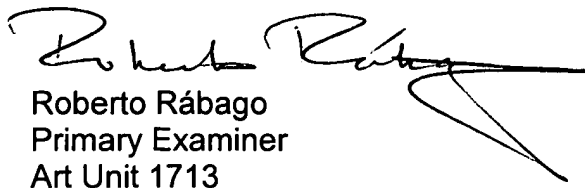

The reference discloses propylene polymerization using an apparatus comprising a conduit with two propylene inlets and a catalyst inlet, further comprising numerous operable valves. The reference does not disclose disassembly/reassembly of the conduit, but one of ordinary skill in the art would be motivated to perform such tasks during routine maintenance and cleaning of the conduit and supporting polymerization apparatus.
